Instructions: Complete handover. Review the information you receive from the nurse and from your review of the patient’s record. Fill in the patient’s information and identify your assumptions. Then, using cultural sensitivity, interview the patient. Identify the differences between your assumptions and what you learned from the patient. What was different than what you expected?

Patient Information	Based on the patient’s information what assumptions can you make?	After you interview the patient, identify the differences between your assumptions and what you learned. What are the differences from your assumptions?
<i>Age: Generation</i>		
<i>Ethnicity</i>
